

## FACULTY OF MEDICINE

*Empowering Innovation in Scientific Research and Education*

### Jacques Loiselet Center for Medical Genetics and Genomics (CGGM-FM)

#### 4150 TapeStation System

#### Acceptable device age

NA

#### Equipment Description

The 4150 TapeStation system is an economic, low-throughput automated electrophoresis platform for nucleic acid sample quality control. Building on the success of the proven ScreenTape technology, it allows a quick, easy, and reliable analysis of DNA and RNA samples for up to 16 samples per run

 [For more details](#)

#### Use (Research, Diagnosis, etc.)

Diagnosis and Research

#### Estimated frequency of use

Daily

#### Possibility of sharing with other laboratories

Yes, more particularly with the biochemistry and microbiology laboratories of the FP, and the genetics lab of the FS, as part of a research project or service provision.

#### Cost Estimate :

\$42,000

For any monetary donation, please scan the QR code  
 Be sure to specify the name of the equipment

Contact us for any new or gently used lab equipment.
